## SIG MARINE COZY CABIN HEATER

MODEL NUMBER	COZY CABIN HEATER P# 10000
HEIGHT	16.25" / 41.3 cm
WIDTH	7.75" / 2.5 cm
DEPTH	7.25" / 18.42 cm
COOKTOP	4" X 5" / 10.2 X 12.7 CM
FLUE SIZE	1" DIAMETER FLUE, MIN HEIGHT 2 FT.
FUEL CONSUMPTION	3.3h /perlb / 7.3h /kg propane
HEAT OUTPUT	6,500 Max Btu / 1.9 kW
FUEL	LOW PRESSURE PROPANE AT 11" wc / .027 BAR / .5PSI
IGNITION	PEIZO PUSH BUTTON SPARKER
SAFETY	FLAME-OUT THERMOCOUPLE PROTECTION, O <sub>2</sub> DEPLETION SENSOR

Product Includes:  
mounting straps, closeable exhaust cap, internal  
dress ring, weather gasket, cast metal warming top.

The Sig Marine Cozy Cabin Heater (propane) is a small but powerful bulkhead mounted propane cabin heater. It provides lots of vented heat for your cabin with a cheery fireplace-like heating element. Brass accents and a cast metal cooktop add to the nautical look of this little heater.

The Cozy Cabin Heater is safe and easy to use. A push button igniter lights the burner easily and the flame is controlled from a easy to grip cool touch handle on the side. Inside the case of the heater are a thermocouple gas shut off component that stops the flow of gas if the heater has gone out, to protect against gas leaking. In addition, this heater features a oxygen depletion sensor. In the unlikely event that the oxygen content in the cabin falls lower than 6%, the sensor will shut off the flow of gas and extinguish the heater.

This heater includes an exhaust cap that can be closed when the heater is not in use, an internal dress ring to hide the hole in the cabin top and a weather gasket. This heater uses 1" stainless tube as exhaust pipe. This tube can easily be found at marine and hardware stores and bent into the desired shape. A minimum pipe length of 2 feet is necessary to remove the vapour caused by the propane combustion.
